Laki Consortium supports government and donor-funded teams that need credible strategy, audience insight, public communication, capacity systems, and adaptive learning routines. The work is designed for complex stakeholder environments where trust, clarity, and implementation discipline matter.

Core Capabilities

- Behavior change strategy and public communication planning.
- Stakeholder mapping, message architecture, and field-ready tools.
- Research, consultation synthesis, MEL frameworks, and learning dashboards.
- Training, facilitation, partner coordination, and implementation playbooks.

Why Laki

- Procurement-friendly scoping and clear deliverable structure.
- Senior advisory model matched to sector, context, and urgency.
- Experience across health, education, WASH, protection, emergency response, and resilience.
- Designed for African, Middle Eastern, multilingual, and multi-partner contexts.

Sector Fit

- Health and risk communication.
- Education and community engagement.
- WASH, protection, emergency response, and resilience.
- Government, NGO, donor, and public-private delivery systems.

Engagement Path

- Rapid intake of RFP, concept note, or terms of reference.
- Executive scope review and proposal refinement.
- Workplan, governance cadence, risk log, and reporting rhythm.
- Implementation support with learning and adaptation checkpoints.

Recommended next step

Book an executive consultation to validate scope, timeline, assumptions, documents, and procurement requirements.
