

PMO and Delivery Capability

Governance, dashboards, risk controls, delivery cadence, and executive reporting for complex development and humanitarian implementation mandates.

Laki Consortium helps teams design and operate practical project management routines that make complex implementation visible. The PMO approach combines decision cadence, risk controls, stakeholder coordination, reporting dashboards, and learning cycles so leaders can manage delivery with confidence.

Core Capabilities

- PMO setup, governance cadence, role clarity, and decision rights.
- Workplan control, milestone tracking, risk logs, and issue escalation.
- Executive dashboards, donor reporting rhythms, and briefing notes.
- Change management, partner coordination, and capacity transfer.

Why Laki

- Built for repeated executive review, not one-off reporting.
- Clear operating routines that can be used by local and remote teams.
- Combines implementation discipline with behavior change and MEL expertise.
- Useful for prime contractors, NGOs, donor programs, and government PMOs.

Sector Fit

- Donor-funded program delivery.
- Government implementation units.
- Humanitarian coordination and field operations.
- SBC, MEL, training, and multi-partner workstreams.

Engagement Path

- Assess current delivery system and reporting requirements.
- Design PMO architecture, tracker, dashboard, and meeting cadence.
- Mobilize team routines, templates, and escalation paths.
- Review performance data and adapt delivery decisions monthly.

Recommended next step

Book an executive consultation to validate scope, timeline, assumptions, documents, and procurement requirements.
